

The JRCERT defines the following as to Program Effectiveness Data:

Annual Program Completion Rate (PCR) - is defined as the number of students who complete the program within the stated program length compared with the number of students who initially started with the cohort.

When calculating the total number of students enrolled in the program, programs need not consider students who attrite due to nonacademic reasons such as:

- Financial, medical/mental health, or family reasons
- Military deployment
- Change in major/course of study
- Other reasons an institution may classify as a nonacademic withdrawal

Credentialing Examination Pass Rate - for radiography credentialing examination pass rate is defined as the number of student graduates who pass, on the first attempt, the American Registry of Radiologic Technologists (ARRT) examination or an unrestricted state licensing examination, compared with the number of graduates who take the examination within six months of graduation.

Job Placement Rate (JPR) - is defined as the number of graduates employed in the radiologic sciences within twelve months of graduation compared to the number of graduates *actively* seeking employment in the radiologic sciences.

The JRCERT has defined “**not actively seeking employment**” as:

- 1) Graduate fails to communicate with program officials regarding employment status after multiple attempts **OR**
- 2) Graduate is unwilling to seek employment that requires relocation, **OR**
- 3) Graduate is unwilling to accept employment due to salary or hours, **OR**
- 4) Graduate is on active military duty, **OR**
- 5) Graduate is continuing education
